

The Asian-Pacific region is currently experiencing remarkable economic growth which has led the area to be known as the growth center of the world. This rapid economic expansion has, however, also aggravated urban problems as cities have experienced a massive influx of new residents. It is now crucial to work towards the solutions of these urban problems.

The Asian-Pacific City Summit, held every other year since 1994, was born from this societal situation so that area leaders could gather together in order to discuss network-building and cooperation among Asian-Pacific cities, share administrative experiences with each other, and have a frank exchange of opinions.
